

UX/UI Process for Hey Honey

Ieva Kirdaikyte, 2026

Agenda

1.	<u>Project Definition & Strategy</u>	<u>3</u>
2.	<u>Competitor & market research</u>	<u>7</u>
3.	<u>User research (qualitative + quantitative)</u>	<u>13</u>
4.	<u>Personas & Empathy Maps</u>	<u>19</u>
5.	<u>User Journeys & Task Flows</u>	<u>22</u>
6.	<u>Feature List & Prioritisation</u>	<u>30</u>
7.	<u>Sitemap MVP</u>	<u>34</u>
8.	<u>Low-fidelity wireframes</u>	<u>36</u>
9.	UI design	<u>TBD</u>
10.	Testing	<u>TBD</u>

1. Project Definition & Strategy

1.1 Project Vision & Goals

1.2 Success Metrics (KPIs) & Scope (MVP)

1.3 Constraints & Assumptions

1.1 Project Vision & Goals

Hey Honey is a digital platform that connects consumers with local beekeepers by offering a curated marketplace for high-quality, locally produced honey. The platform allows users to discover, filter, and purchase honey by type, origin, and flavor, while also providing options for gifting and flexible subscription plans. To build trust and community, the platform includes customer ratings and reviews, as well as weekly recipes showcasing creative uses of honey.

The dual value proposition:

- **For consumers:** A simple, enjoyable way to find authentic, traceable honey and engage with local food culture.
- **For farmers:** A sustainable sales channel that increases visibility and direct access to customers.

Goals:

- Simplify the process of discovering and purchasing high-quality, locally produced honey.
- Build user trust and engagement through transparent product information, ratings, and reviews.
- Encourage recurring revenue through flexible subscription models.
- Support farmers by providing them with a fair, digital-first marketplace.
- Inspire and educate customers with weekly honey-based recipes.

1.2 Success Metrics (KPIs) & Scope (MVP)

To measure the effectiveness of Hey Honey, success will be tracked through:

- **Conversion rate** (product views → purchases): target $\geq 5\%$ in first 3 months.
- **Subscription adoption rate**: % of users who choose a subscription model — target $\geq 20\%$.
- **Gift purchase share**: % of total orders marked as gifts — target $\geq 15\%$.
- **User engagement**: average session time, recipe views per user, repeat visits.
- **Review activity**: % of purchases leading to ratings/reviews — target $\geq 30\%$.
- **Farmer adoption**: number of active farmers onboarded within first year — target ≥ 50 .

Scope (MVP)

- **Product discovery**: searchable and filterable honey catalog (type, origin, price, jar size).
- **E-commerce core**: product detail pages, cart, checkout, gift option, subscription setup.
- **Community features**: ratings, reviews, recipe section.
- **Farmer profiles**: background stories and sourcing transparency.

1.3 Constraints & Assumptions

- Initial focus on mobile-first design, with a responsive desktop version.
- MVP limited to a single country/region to ensure local authenticity.
- Farmers are responsible for shipping and logistics.

2. Competitor & Market Research

2.1 Bee Farm

2.2 Honig.ch

2.3 Competitive matrix

2.1 Bee Farm

What it is: a small producer offering a few types of honey and a subscription service.

UX/UI strengths

- Strong storytelling: the site highlights the farm, terroir, and certifications, which builds trust and shows local authenticity.
- Clear subscription setup: users can choose how many jars, what size, and whether they want a mix. The perks (like extra jars for annual plans) are explained simply.
- Clean product catalogue: products are easy to scan, with clear prices and “Add to cart” buttons.

UX/UI weaknesses / opportunities

- Limited discovery: no filters or ways to sort products - fine for a small shop, but won't scale for a marketplace.
- No reviews: users can't see ratings or feedback from others, which weakens trust.
- Rigid subscription: deliveries are fixed every 3 months, with no clear way to pause, skip, or adjust frequency.

Key UX patterns to borrow

- Keep provenance details and certification badges visible on product pages.
- Keep subscription options simple and clear - but improve with more flexible management (edit, pause, skip).

Bee Farm is an apicultural company located in the heart of Canton Ticino, founded by Aram Berta and Maria Conzelmann. With passion

SWISS ARTISAN CHESTNUT HONEY

from CHF 13.50

Our chestnut honey is a premium product, harvested in the lush forests of the Locarno valleys. The bees feed on the nectar of chestnut flowers, giving the honey its robust and slightly bitter flavor, with hints of wood and tobacco. This honey stands out for its dark color and dense consistency, rich in antioxidants and minerals. Perfect for pairing with aged cheese and red meats, chestnut honey is also an excellent natural sweetener for hot beverages and a great addition to breakfast. Order now and bring home the authentic taste of the Swiss Alps!

General condition of purchase

2.2 Honig.ch

UX/UI strengths

What it is: Small family business selling Swiss honey and a few rare varieties. The site focuses a lot on storytelling.

- Strong artisan feel: long texts about quality, process, and farm location make the brand feel authentic and trustworthy.
- Simple product presentation: clear tiles with prices, easy “view all” option - minimal and straightforward.

UX/UI weaknesses / opportunities

- Missing product descriptions - many items only show name and price, with little detail.
- No advanced e-commerce features: no filters, subscriptions, or reviews.
- Limited discoverability: only two categories (Swiss / rarities), no way to filter by honey type, texture, or jar size.
- Language barrier: site is only available in German, which limits accessibility for non-German speakers in Switzerland.

Key UX patterns to borrow

- Keep the authentic storytelling and provenance info on product/farmer pages to build trust.
- Keep pricing and product presentation simple, but add richer features like filters, reviews, and subscriptions.

2.3 Competitive matrix

Feature / UX aspect	Hey Honey (concept)	Bee Farm	Honig.ch
Product range	Multi-farmer marketplace, broad selection	Small, single-producer	Limited, single-producer + rarities
Filtering / discovery	Advanced filters (type, origin, jar size, certifications)	No filters	Very basic categories only
Subscriptions	Flexible (weekly/monthly, pause/skip/edit)	Fixed (every 3 months, limited options)	None
Gift options	Gift wrapping, messages, gift subscriptions	None	None
Reviews & rating	Integrated reviews for products + farmers	None	None
Farmer profiles	Dedicated pages with story, photos, provenance	Some storytelling in About section	Long-form story on site, but no profiles per product
Languages	Multilingual (DE/EN/FR for Swiss market)	German/English mix	German only
Design / UI style	Modern marketplace UI, mobile-first	Clean but minimal	Simple, traditional
Engagement content	Weekly recipes, tips, blog	Some news posts	Storytelling, but no fresh/ongoing content

3. User research (qualitative + quantitative)

3.1 Planning & Defining

3.2 Interview Insights & Survey Results

3.1 Planning & Defining

To better understand user needs and expectations around honey purchasing, I conducted **four in-depth interviews** with friends who represent different buyer types (everyday shoppers, foodies, health-conscious buyers, and potential gift givers). I also ran a **short survey with 10 respondents** to validate patterns quantitatively.

- Goal: understand buying habits, decision factors, gifting & subscription potential
- Methods:
 - 4 interviews (target buyers: everyday shoppers, gift buyers, foodies)
 - 10-person survey (quantitative validation)

Interview questions:

1. “Can you tell me about the last time you bought honey? Where did you get it, and why from there?”
2. “When you choose honey, what factors matter most to you (e.g., flavor, price, origin, organic, packaging, brand)?”
3. “How do you feel about buying honey directly from local farmers or small producers instead of supermarkets?”
4. “Have you ever bought honey as a gift, or would you consider it? In what situations?”
5. “If you could subscribe to regular honey deliveries or discover new types of honey each month, what would be appealing or not appealing to you?”

Survey questions:

1. **How often do you buy honey?**
 - ☐ Weekly
 - ☐ Monthly
 - ☐ Every few months
 - ☐ Rarely / never
2. **Where do you usually buy honey?**
(multiple choice)
 - ☐ Supermarket
 - ☐ Local farmer's market
 - ☐ Specialty / organic shop
 - ☐ Online shop
 - ☐ Directly from a beekeeper
3. **What factors are most important when choosing honey? (select up to 3)**
 - ☐ Flavor / type (e.g., acacia, chestnut, wildflower)
 - ☐ Local origin / provenance
 - ☐ Organic or certifications
 - ☐ Price
 - ☐ Packaging / design
 - ☐ Brand reputation
 - ☐ Recommendations / reviews
4. **Would you be interested in subscribing to a regular honey delivery?**
 - ☐ Yes, weekly
 - ☐ Yes, monthly
 - ☐ Maybe, if I can pause/skip anytime
 - ☐ No, I prefer one-time purchases
5. **Have you ever bought honey as a gift (or would you consider it)?**
 - ☐ Yes, I have
 - ☐ Not yet, but I would consider it
 - ☐ No, I wouldn't
6. **How likely are you to read or write reviews when buying food products online?**
1 = Never, 5 = Always (Likert scale 1–5)

3.2 Interview Insights & Survey Results 1/3

1. Buying Habits & Channels

Findings from Interviews

- Supermarkets are preferred for convenience (Maria, Eva).
- Farmers' markets and organic shops are seen as higher quality and more trustworthy (Lucas, Isabell).
- Some would like to buy from local beekeepers but lack easy access.

Findings from Survey

- 7/10 buy in supermarkets
- 3/10 at farmers' markets
- 2/10 in organic shops
- 1/10 directly from a beekeeper

Key Insight / Opportunity

Users want authentic, local honey but default to supermarkets because it's easier to find.

→ Hey Honey can bridge this gap by connecting users with local producers through one simple platform.

2. Decision Drivers

Findings from Interviews

- Price is a key factor for many (Maria, Eva).
- Local origin and organic quality are important for building trust (Lucas, Isabell).
- Packaging only matters when it feels cheap (e.g., plastic jars).

Findings from Survey

- Flavor/type (6 votes) and price (4) are top decision factors.
- Local origin (3) and reviews/recommendations (4) also matter.
- Packaging, brand, and design have minimal influence.

Key Insight / Opportunity

Flavor, price, and trust are the main decision drivers.

→ Highlight provenance, organic certification, and flavor descriptions in the product experience.

3.2 Interview Insights & Survey Results 2/3

3. Local vs. Supermarket Honey

Findings from Interviews

- Maria: wants to buy local but doesn't know where to find farmers.
- Eva: believes local honey is more expensive.
- Lucas and Isabell: already buy directly from farmers and believe it's better quality.

Findings from Survey

- 3/10 users already buy from farmers' markets or organic shops.
- The rest are interested but find it less accessible or more expensive.

Key Insight / Opportunity

People prefer local honey for quality reasons but face barriers of access and price.

→ *Hey Honey can make local honey visible, easy to compare, and transparent in pricing.*

4. Gifting Behavior

Findings from Interviews

- Maria gifted honey to her boyfriend when he was sick.
- Isabell included honey in a birthday gift basket.
- Lucas and Eva haven't gifted honey but said they would like to - Eva mentioned, *"I like gifts you can eat or drink."*

Findings from Survey

- 4/10 have bought honey as a gift.
- 6/10 haven't yet but would consider it.

Key Insight / Opportunity

Honey is seen as a warm, thoughtful, and practical gift.

→ *Hey Honey can position gifting as a key feature - with bundles, custom packaging, and personal messages.*

3.2 Interview Insights & Survey Results 3/3

5. Subscriptions & Discovery

Findings from Interviews

- Maria: would subscribe for a discount or free testers.
- Lucas: wants flexibility - ability to skip, pause, cancel anytime.
- Eva: doesn't trust subscriptions; worries about hidden rules.
- Isabell: likes the idea of loyalty points (like Coop).

Findings from Survey

- 7/10 open to a subscription *if it's flexible and transparent*.
- 2/10 interested in monthly or weekly plans.
- Only 1/10 completely not interested.

Key Insight / Opportunity

Subscriptions are appealing only when users feel in control.

→ Offer flexible plans (pause/skip/edit anytime) and reward loyalty with points or perks.

6. Pain Points & Opportunities (Synthesis)

Main Pain Points

- Difficult to access local honey or know where to find farmers.
- Lack of trust in supermarket quality.
- Subscriptions perceived as rigid or risky.

Opportunities for Hey Honey

- Make local honey easily discoverable and trustworthy.
- Introduce flexible, user-controlled subscriptions.
- Highlight provenance, reviews, and farmer transparency.
- Create gifting options with customizable experiences.

4. Personas & Empathy Maps

4.1 Personas

4.2 Empathy Map Summary

4.1 Personas

Everyday Ella, 24

 Marketing Assistant
 Zurich

Goals

- Buy honey easily along with other groceries
- Find good quality at a reasonable price
- Support local producers if it's easy and not too expensive

Frustrations

- Doesn't know where to find local honey
- Finds local/organic products expensive or hard to access
- Feels supermarket honey is "okay" but not special

"I'd love to buy local honey, but I don't know where to find it - and I don't have time to look for it."

Conscious Luca, 35

 Architect
 Lausanne

Goals

- Support small local producers
- Discover new honey types and authentic flavors
- Be sure the product is real, organic, and fairly priced

Frustrations

- Local honey is not always available or transparent online
- No easy way to compare origin and quality
- Subscriptions often feel too rigid or unclear

"I like trying different local honeys, but finding them online is a pain."

Gift Isabell, 30

 HR Manager
 Basel

Goals

- Buy honey as a healthy, beautiful gift
- Easily personalize orders (gift messages, bundles)
- Possibly subscribe to regular deliveries for herself and gifting occasions

Frustrations

- Gift options in online shops are limited or impersonal
- Subscription plans often lack flexibility or rewards
- Hard to find authentic, local brands with nice packaging

"I love giving small local products as gifts — it just feels more personal."

4.2 Empathy Map Summary

5. User Journeys & Task Flows

5.1 Overview

5.2 Product Discovery & Purchase

5.3 Subscription Management

5.4 Gift Purchase Flow

5.1 Overview

Based on the personas and research, I mapped three primary user journeys for *Hey Honey*:

1. **Product Discovery & Purchase** (for Everyday Ella)
2. **Subscription Management** (for Conscious Luca)
3. **Gift Purchase Flow** (for Gift Isabell)

Each journey highlights user actions, emotions, and potential pain points, helping define where the interface needs to feel simplest, most flexible, or most emotional.

5.2 Product Discovery & Purchase

Everyday Ella, 24

Scenario: Buying a jar of local honey quickly and easily

User journey map

Stage	Action	Thought	Emotion	Opportunity
Discovery	Browses homepage and sees local honey listings	"I just want something simple and natural."	🤔 Curious	Highlight popular honeys or "local favourites" on homepage
Filtering & Browsing	Uses filters (type, origin, price, organic)	"So many options — I hope I can find what I like fast."	😓 Overwhelm	Use clear filters, tags, and preview images
Product Details	Clicks a honey product	"Looks good — is it organic and from Switzerland?"	🤔 Curious	Emphasise origin, reviews, and farmer info
Add to Cart	Adds product to cart	"That was easy."	😊 Happy	Show mini cart confirmation (toast)
Login / Register	Prompted to log in or continue as guest	"Ugh, do I need an account?"	😞 Unhappy	Allow guest checkout but promote benefits of account ("track orders, save favorites")
Checkout & Payment	Enters delivery + payment info	"Hope it arrives soon."	😊 Neutral	Offer one-page checkout and delivery date info
Confirmation	Sees confirmation screen + email	"Nice, that was simple."	😊 Happy	Suggest related products or subscription offer

5.2 Product Discovery & Purchase - Task Flow Diagram

Decision Points:

- Choose filters (type, flavor, price, etc.)
- Add to cart vs. "Subscribe & Save"
- Log in or continue as guest
- Choose delivery option

Mobile Experience	Desktop Experience
Filters in collapsible bottom sheet	Filters visible in sidebar for faster overview
Simplified checkout, minimal input fields	One-page checkout with address autofill
Emphasis on speed & clarity	More detailed product info and farmer stories

5.3 Subscription Management

Conscious Luca, 35

Scenario: Setting up and managing a regular honey delivery

User journey map

Stage	Action	Thought	Emotion	Opportunity
Discovery	Lands on product page, notices "Subscribe & Save" option	"A subscription could be interesting — but what's the catch?"	🤔 Curious	Highlight benefits & show "Cancel anytime" reassurance
Plan Selection	Clicks "Subscribe & Save" → chooses jar size, frequency	"I'd like something monthly — but can I change later?"	😟 Unsure	Show flexibility: "Edit, skip, or cancel anytime"
Login / Registration	Prompted to log in or create account	"I hope this doesn't take too long."	😬 Anxious	Offer fast sign-up (Google/Apple) and explain why account is needed ("to manage your plan")
Checkout & Payment	Reviews plan summary and confirms payment	"Nice, looks simple enough."	😊 Happy	Keep checkout short and transparent
Confirmation & Setup	Sees confirmation screen and email with plan details	"Nice — I'll check my next delivery date later."	😊 Happy	Encourage exploring "My Subscription" dashboard
Manage Subscription	Returns later to pause, skip, or change cadence	"Good that I can control this easily."	😊 Confident	Offer clear dashboard and notifications before delivery

5.3 Subscription Management - Task Flow Diagram

Decision Points:

- Choose between subscription or one-time purchase
- Pick frequency (weekly, monthly, flexible)
- Choose to log in or sign up
- Option to personalize or add a gift note (future feature)

Mobile Experience	Desktop Experience
Inline login/register modal (no redirect)	Login/register as part of checkout flow
Minimal subscription setup (progress bar for clarity)	Multi-step summary visible on one page
Manage subscription via simple bottom nav link	"My Account" dashboard with multiple plans

5.4 Gift Purchase Flow

Gift Isabell, 30

Scenario: Buying honey as a gift for a friend's birthday

User journey map

Stage	Action	Thought	Emotion	Opportunity
Discovery	Browses homepage → clicks "Gifts"	"I want something small but meaningful."	🤔 Curious	Highlight gift section clearly on homepage
Exploration	Looks through gift sets, reads descriptions	"These look nice — but which one is best?"	😕 Unsure	Add comparison or "Most popular" tags
Personalisation	Adds message & packaging option	"I love that I can personalise this!"	😊 Happy	Show live preview of personalised note
Checkout	Enters recipient address, selects delivery date	"I hope it arrives on time."	😬 Anxious	Include delivery estimate & confirmation
Post-purchase	Gets confirmation email	"That was easy — I'd use this again."	😊 Happy	Suggest creating an account to track gifts

5.4 Gift Purchase Flow - Task Flow Diagram

Decision Points:

- Choose between predefined gift sets or customise your own
- Add personal message or skip personalisation
- Choose shipping to self or recipient

Mobile Experience	Desktop Experience
Step-by-step guided flow (one decision per screen)	All gift options visible at once (grid view)
Use collapsible sections for personalisation	Live preview of message & packaging side-by-side
Minimal text and large tap areas	Richer details, comparison table for bundles

6. Feature List & Prioritisation

6.1 Full List of Features

6.2 Prioritisation (MoSCoW Framework)

6.1 Full List of Features 1/2

Shopping & Product Search

- Product listing with filters (type, origin, price, organic)
- Search bar with autocomplete
- Product detail page (photos, description, reviews, farmer info)
- “Add to cart” and mini-cart preview
- Related products / “You may also like”

Subscription & Personalisation

- “Subscribe & Save” option on product pages
- Flexible subscription management (pause / edit / skip / cancel)
- Frequency selection (weekly / monthly / custom)
- Account dashboard with active plans
- Rewards or loyalty points system
- Personalised honey recommendations based on past orders

Gifting Experience

- “Send as a gift” option
- Add personal message and recipient details
- Gift bundle or curated “gift sets”
- Scheduled delivery (birthday, holiday, etc.)

6.1 Full List of Features 2/2

Social Proof & Community

- Product ratings and reviews
- “Meet the beekeeper” profiles (with short bio and farm info)
- Weekly recipes using honey
- Blog / “Learn about honey” section

Checkout & Account

- Guest checkout + optional login/register
- Secure payment integration (card, Twint, Google Pay, Apple Pay)
- Order confirmation & tracking
- Simple “My Account” area for orders, subscriptions, and saved favourites

Usability & Support

- Responsive mobile-first design
- Customer support / FAQ
- Notifications for next delivery or new products

6.2 Prioritisation (MoSCoW Framework)

Priority	Features
Must have (MVP)	Product listings & filters; Product detail page; Add to cart; Checkout (guest + login/register); Subscribe & Save; Manage subscription (pause/edit/stop); Reviews & ratings; Account dashboard; Responsive mobile-first design
Should have	Gift option; Farmer profile; Recipes section; Order tracking
Could have	Loyalty points; Map of local producers; Personalised recommendations; Scheduled gifting
Will not have (for now)	Blog; Advanced Filtering; Chatbot Support
